New Premises Update – October 2010

Firstly my apologies for not providing an update for September as I was extremely busy with departing for California and now write this from Encinitas.

Following on from the questionnaire update, I am happy to announce that a Spiritual Foundation group has been formed from the respondents with 5 members now incorporating specific prayer, affirmation and visualization into their daily meditations to create a secure, harmonious and joyful foundation for our new premises. The current members are Yvonne, Barbara, Cissy, Ursula and Laurie.

I am also very happy to welcome the new trustees also as members of the Spiritual Foundation group and greatly appreciate their commitment to creating and sustaining a pure and joyful group consciousness in all that we do. Thanks to Terry, Helen, Chris and Gaby for joining us and bringing our number to nine.

The activity of spiritual foundation group is much like that of the Compassion Committee. We are forming a foundation in a similar way to laying the foundation for a city building. If you have ever watched a construction site for a major city building, there is not usually much to see for the first 9 -12 months but a lot is happening.

There is a high fencing around the site and lots of activity going on inside, digging deep, deep down into the earth, preparing to lay very sturdy and strong foundations of concrete and steel that will keep the tall building stable and strong, come what may.

In the same way, the foundations we are laying are those of harmony, joy and attunement with Guruji's will. From this base all other work can be carried out. This foundation work will continue right throughout the process of acquiring our own premises, gathering momentum as others join us.

So that we can all remain on the same wavelength and harmonise with Guru's will to the best of our ability, it is important that any new members joining the foundation group become aware of the process that has brought us to where we are at now. This is done by reading through all the relevant information to date, from the initial general meeting notes and appendices, to the monthly updates then meditating on and reviewing these daily over a period of a week or two, seeking to gain attunement with the other of the group.

When that attunement is felt then a new member can join the others of the group by incorporating the current group affirmation and prayer into daily individual meditations. This helps us let go of any individual desires or objectives, surrender to Guru's will and move forward in a synchronized harmony.

Anyone wishing to be involved in any outer aspect of the new premises activity will need to join the foundation group, and attune to the process before engaging in any outer activity. In this way we hope that we are doing our best to ensure that harmony and joy will always prevail.

I would like to invite any others who are interested to join us in this noble cause. Please email me if you wish to join us or have any questions. The more help we have the more progress we can make.

Jai Guru

Laurie
